health care**

HOW YOU CAN MAKE A DIFFERENCE

Marshfield Clinic®
HEALTH SYSTEM

FOUNDATION

Support the future of health care in your community through education.

Education is an essential pillar of Marshfield Clinic Health System's mission: enriching lives. Whether it be the patients we serve at MCHS or the students we train who will care for us tomorrow, education is key.

Gifts from people like you help to fund education programs throughout MCHS, including residencies, fellowships and community education. Important education programs such as the Simulation Lab and nursing education are made possible because of your support.

These services work together to build healthier communities today and for future generations.

Help train tomorrow's caregivers and advance education programs for the patients we serve.

"Medical education is critical to our mission at MCHS. The intellectual curiosity brought forth by our residents and the dedication to training future surgeons enhances all of our knowledge. Philanthropic support of resident research and well-being will further enhance our programs and overall mission."

Dr. Jessica Wernberg,
Marshfield Center General Surgery

INVESTING IN THE FUTURE OF HEALTH CARE - EDUCATION

You can invest in the future of health care with residency and fellowship programs and community education. Many of MCHS' education programs are made possible by the generosity of people like you:

- **Simulation Lab** - The Sim Lab trains current and future caregivers on best practices for patient experience, surgical techniques and primary and emergency care procedures. Sim Lab educators also lead community education training for CPR, school athletics programs and local police and fire departments.
- **Nursing education** - With the need for trained nurses at an all-time high, MCHS nursing education programs in partnership with UW-Eau Claire are working to bring more students into a nursing career through a combination of hands-on experience and quality instruction. The nursing education program is also in need of philanthropic funding for a tuition reimbursement program to for continued education.
- **Resident research** - The resident research program is dedicated to training gifted researchers from the earliest stages of their careers. Your support of this program elevates the training of residents, attracts and retains residents who go on to fellowships, and fosters future academic and research-oriented physicians.
- **Resident and fellowship programs** - Many areas of patient care throughout MCHS rely on philanthropic funding for resident education, including primary care, family medicine, psychiatry, dermatology and more.

**Add your support to
advance health care for
generations to come.**

Together we enrich lives.

Marshfield Clinic Health System Foundation enriches lives by shaping the future of patient care, research and education at Marshfield Clinic Health System through philanthropy. Since the 1970s, over \$100 million in philanthropic support has been given to benefit Marshfield Clinic. Philanthropy at Marshfield Clinic Health System provides an opportunity for grateful patients to thank their care team, helps ensure our research and education programs remain strong and gives our providers the important resources they need to care for their patients.
