**Advancing innovation for
compassionate care**

HOW YOU CAN MAKE A DIFFERENCE

Marshfield Clinic®
HEALTH SYSTEM

FOUNDATION

Bring innovative treatments and hope for a cure to patients in Wisconsin and beyond.

At Marshfield Clinic Health System, the science is the care.

Marshfield Clinic Research Institute scientists work alongside physicians and staff across our system to integrate research and clinical care. Because of research, MCHS patients have access to clinical trials, personalized treatments and support networks.

Gifts to research allow Marshfield Clinic Research Institute scientists to improve patient care by studying rare diseases, oncology, cardiology, pediatrics, neurological disorders and stroke, population health, agricultural health and safety, precision medicine and more.

With your help, our scientists and care teams can use research to better diagnose, treat and ultimately cure life-threatening conditions.

"I was blessed to have stem cell replacement through research at Marshfield Clinic. What advancements we have made. The type of cancer I have, ten years ago I probably wouldn't be here. But because of research I'm able to be here for my kids."

Len Luedtke, Jr., grateful patient

ADVANCING INNOVATION FOR COMPASSIONATE CARE
- MARSHFIELD CLINIC RESEARCH INSTITUTE

Marshfield Clinic
HEALTH SYSTEM
FOUNDATION

You can help fund pioneering studies across Marshfield Clinic Research Institute's centers of excellence. Your gifts are needed to support important research areas, including:

- **Cancer care** - offering clinical trials and integrated care through the Cancer Care and Research Center.
- **Precision medicine** - finding treatments for life-threatening and rare diseases and supporting preventive medicine using by studying patients' unique genetic makeup.
- **Agricultural health and safety** - developing strategies to care for the mental, emotional and physical well-being of farmers and farm families, especially in rural areas.
- **Rare diseases** - the CRIBBS (Clinical Registry Investigating Bardet-Biedl Syndrome) was the first of its kind to study the effects of BBS. The BBS task force at MCHS cares for BBS patients worldwide with unique clinical trials and multi-specialty clinics.
- **Neurological disorders and stroke** - researching genetic markers for neurological disorders and conducting studies to reduce the risk of stroke.
- **Cardiology** - studying the causes of heart conditions and developing personalized treatments for patients.
- **Trauma** - finding new protocols for trauma patients to get them the medical help they need faster and help them heal.
- **Health services** - developing strategies to streamline and advance patient care across our system.
- **Internships** - offering a unique 12-week internship experience for undergraduate and graduate students to foster a career in research.

Add your support to drive discovery and offer advanced treatments for patients across our system of care.

Together we enrich lives.

Marshfield Clinic Health System Foundation enriches lives by shaping the future of patient care, research and education at Marshfield Clinic Health System through philanthropy. Since the 1970s, over \$100 million in philanthropic support has been given to benefit Marshfield Clinic. Philanthropy at Marshfield Clinic Health System provides an opportunity for grateful patients to thank their care team, helps ensure our research and education programs remain strong and gives our providers the important resources they need to care for their patients.
